[Final - Sampling and Analysis Plan - Surface Water.pdf](#)

I would just put in the POLREP that we have forwarded air monitoring and water sampling data to Phil Turner to review... do not get into the benzene...

Philip do you mind reviewing this surface water data that Exxon has collected thus far? There have been some low conc. Benzene detections that Exxon believes are unrelated to the spill. They are near shore and believed to be from motors which are pumping water across the road as a precaution against flooding. There will be additional samples collected over the next couple of days to verify this. Thanks.

Tom/Bill/Mike,

Please forward lab results to your contacts in your respective agency.

I am available to discuss via conference call or in person at the command center if anyone has comments or questions.

I will forward as more becomes available.

Plan will be amended this afternoon to reflect the additional sampling and analysis.

Thanks,

Scott,

Attached are the lab results from 3-29 through 3-31. Please let me know how else we can support you guys when it comes to soil sampling and residential sampling as we have local resources available.

Thank you,

Kyle Lawrence
